Our Vision

To seed talented students for
successfully acquiring entrepreneurial skills
and enhanced employability
at global level.

Opportunities do not come
walking to you,
You have to create them

Convert opportunity into success!

Mr. U.D. Patil

The Giver gives, the receiver Receives and one day the Receiver also learns to give like the giver.

Respected Shri Suresh Dada Jain prayed to God in the words that he may share the wealth he has been blessed with, among the poor, needy and intelligent students and brighten their Lives.

Dada's Respected mother always said everyone has a share in my belongings. Some children are deprived of education and lose their opportunities simply because of financial challenges. Keeping this thought in mind, Dada for many years has been lending a helping hand to all students irrespective of their caste and religion and it was from this sentiment that SD-SEED was born.

There are many people give donations and do charitable works, but Hon Dada in order to educate the students of Khandesh region has opened the doors of charity in the form of SD-SEED. I would like to request all students to make the right decisions, reach the pinnacle of success and make Dada's SD-SEED scheme proud of your achievements.

In this regards I would like address SD-SEED beneficiaries on this occasion :

In order to reach the summit of success you should embark on the path of visionary genius and change your perspective and the way you look at things which help you to dream bright dreams. Wishing all students a Happy New Year !

At the pinnacle of success: Once you are successful, you become a different person. You may come first or win the shield in a competition, or score high marks in an exam, you should not be carried away by this success. When people appreciate the student's success, it is only those students who do not think of themselves as 'I am very special' and do not look down on others, who are able to reach the pinnacle of success.

Questioning mind : Students should be humble. If a student has a questioning mind, then he needs to consciously develop a questioning attitude, which will help in solving major future problems. Remember that a question is a sign of an active person. Those who have questions about the world and are struggling to find the answers, they are the ones who become important persons in life. So don't be burdened with any questions.

Player Attitude: Today, we see that suicide is the last step and it should be avoided. This is called Life. In the absence of

competition when we co-operate to achieve our goals, there is no conflict of who will take the credit. Victory, defeat, honor, humiliation, profit, loss are a part of daily life and the student who understands this will be able to develop his player attitude and remember such students can become like 'Arjun'.

Confidence: By consciously deciding and planning on small issues in detail, we can build our self confidence. This will further make us confident to take decisions on achieving our other minor and major goals. Resolutions should be made at the beginning of the school year and pursued continuously to achieve their fulfilment. The achievement of these resolutions, to solving our own problems and current woes, to finding solution to the problems we face while preparing for competitive exams, all this gradually increases our confidence.

Effective use of time : A Student's life is one of the most important stages of life. It is time when you can create your bright future. It also the time when a student's personality and overall development takes place. Make the most effective use of time. Don't waste time, because it is never going to come back. You should constantly read or write something. Ramdas Swami in one of his sermons, encouraged students with these words, "you should always keep writing" and you are aware, 'If you read, you will be saved'.

Student friends, you are educated and cultured, become ideal students and make the name of family, village, nation proud. Prepare for competitive exams in this era of competition. Don't go the wrong way. Be sincere in your efforts to be successful. Just as words adorn a sheet of plain paper, similarly your life should be adorned with your successes.

Editorial Committee

Shri Rajesh Yawalkar (Chief Editor)

Shri. N.J. Gadiya, Shri Mahesh Gorade, Shri Nilkanthrao Gaikwad, Shri Milind Kulkarni, Prof. S.V. Somavanshi

"A person who is already in distress and who still desires to help others is the best person in the world."

The Chairman of Microsoft, Bill Gates is the world's richest person. Once a journalist asked him, "How do you feel now, as you have been declared as the richest person in the world?" Bill Gates answered "I am not the richest person in the world, but a 12 year old boy who sells newspaper is richer than me", and he narrated the following incident. Once, at New York Airport I went to the newspaper stand to get a newspaper. This stand was manned by a young boy who was hardly 12 years old. As luck would have it, I had no money and kept back the paper in its place. However, the boy offered me the paper free of charge. I felt awkward. The boy said, "Sir I am not giving out this paper from the amount of my investment, but I am giving you this paper from the profit which I earn by selling this papers." Therefore, I feel that the boy who was already facing difficulties, is richer than me as he was pleased to help others. **A person who is already in distress and who still desires to help others is the best person in the world.**

A person's greatness is not judged based on his wealth, or his education or his position in society, but it is based on his attitude of helping and supporting others. Shri Suresh dada supports intelligent and financially challenged students through innovative and different means, even though he himself is experiencing unfavourable and difficult times.

If we feed a hungry person, it is a noble deed but this is a temporary solution. The problems faced by intelligent and financially challenged students can be permanently solved by education, which will help in acquiring knowledge and skills and further lead to the family's progress. This is a noble task and Shri Suresh Dada's commitment to this task is commendable. Dada's magnanimous heart always beats for others and it is rare to find persons with such a deep sense of social commitment.

An optimistic person always finds an opportunity in difficulty but a pessimistic person always find difficulty

in an opportunity. His attitude to help the students even though he is facing lot of problems his optimistic views are appreciable.

Time is the important matter in the twenty first century. Time waits for no man. Time which has passed does not return. Time will anyway move on, but the question is 'How did you make use of time?' "how I can use this moment of my time profitably?". Dada did not think about his own adversity but gave priority to the needs of students.

We have all read the story of the mythological King Harishchandra who undertook various difficulties to keep a promise he had made in a dream. We do not know its veracity. Another example is of our Late ex-President Shri APJ Abdul Kalam, who visited a Science Exhibition and was very impressed with the idea and the instrument a student had made. He wanted to understand everything, but he was short of time. Shri kalam promised the student that I will visit your house one day to understand all aspects of the machine. However, for a long time, Shri Kalam did not visit the student's house and the student also gave up hope of the visit materialising. The visit became a reality after nearly two years, when Shri APJ Abdul Kalam visited the student's house, understood the machine, praised and guided him. There are a few people who keep their promises which is truly their greatness.

This Scholarship awarded by SD-SEED has given many students an opportunity to continue their studies and is also like an adopted parent to some students. This has all been made possible due to the inspiration, guidance and assistance extended by Dada.

Dear Students, I request all of you to study studiously, work hard to complete your education successfully. We should always make all efforts to make Dada and his family proud.

Mr. Nilkanth Gaikwad

In the last four months SD-SEED conducted 21 programs in order to focus on developing the three main constituents of the educational field : Student for development their latent skills, parent and teachers providing appropriate counselling and also to enhance the quality of education. These programs benefitted 2450 students.

Effective Speech Techniques and Spells

The moment some one has to give a speech, they get knots in their stomach, their throat goes dry, their hands and feet tremble & begin to sweat, their chest begins to shake, they run away from their seats, etc. etc. These are some of the symptoms what may occur together or in isolation and are termed as 'to get scared'. Some are afraid of the mike, some are not able to speak like speakers they have heard before, others are afraid that people will laugh at them, etc. If you stand up to deliver a speech, what will you say? At the last minute, the person fears if he hesitates, his co-worker will be in trouble for the rest of his life.

When the listener feels that he should continue listening to the speaker, that is when the speaker's attitude is manifested in his speech.

Speech is an art. Art is always demanding and challenging. The features of effective speech are : clarity, fluency, openness, humility, freedom of thought, pleasantness of voice, dexterity, tenderness and resilience are different parts. Let's consider some of them below :

Techniques and systems needed for effective speech skills

1. Clarity: A person's speech is clear if his thought process is clear. One should think and then speak, instead of speaking and then thinking. Logical analysis of thought and poignant expression are needed for clarity.

2. Easy to understand : it is very easy to say what is difficult, but is difficult to say what is easy. The beauty of speech lies in its simplicity. If you see sculpture, you will observe that is simple yet beautiful. Speech should be similar, simple and clear. Avoid heavy words, jarring phrases, complicated sentence constructions.

3. Brief & Concise : Briefness or conciseness is the soul of wisdom. It is a sign of maturity of thought. The soundness and precision of the words are symbols of mastery over language. Words should always be measured and evaluated before talking.

4. Gentleness and skill: express yourself strongly but let your words & speech be polite. Clarity of speech is not arrogance or sarcasm. Etiquette should be followed when speaking. There should be gentleness in voice and speech. Personal prejudice, hatred, outrage, ethnic and religious references should be avoided.

5. Consciousness, expression and characterization: your independent thoughts are born from reading, contemplation, meditation. We must learn to think universally. The topic to be discussed should have complete information of all relevant areas. The speaker should have passion and warmth in his voice. The words should come from the heart and not from the lips. There is no truth without honesty and experience. The depth of thought depends on the depth of conduct. Voice modulation should be

used while speaking. It is boring to hear some one speak in the same tone. The beginning and the end of the speech are crucial and they are the strength of the speech,

Five Steps to Success in Speech Success

1. Prior Preparation : you need to keep the following in mind as you prepare for your speech. First of all it is important to decide what is the topic of the speech. Be prepared with the points you will cover. Understand the reason for this speech, whom are you addressing and the points you need to watch out for.

2. Speech Preparation: Once you have gathered all the required information, take some time to ponder over it. After you have thought about everything, decide and finalise your own opinion. everything is gathered, it will take two or three days to meditate on it. In this meditation, decide your own opinion on the subject and confirm it. Once you have finalized your speech, note down the draft commentary and points you may want to use in the speech and delete the rest. Finalise the length, content and duration of the speech. Also, keep in mind the reference examples, statistics, short stories to be shared.

3. 'Writing' to languages ..! : Write down the whole speech once all the issues have been decided. The talk should have a simple introduction, substantive points and opinions on it, contradictions and finally the conclusion of the speech in such a way so it can be properly presented. A written speech will help you remember, choose words that are easy to pronounce and above all audience will be able to understand you clearly. It will also help you check the syntax, grammar, meaning of stories, references used or statistics. After the speech is written properly, check to see if it fits into the scheduled time.

4. Speech practice: It is important to remember that the words of speech, the consistency of points. Do not practice the speech. You should read the speech 3 - 4 times, with utmost concentration how you watch your favourite movie and you will remember it forever. Train yourself in front of the mirror as to how to speak, where to stop, sound fluctuations, emotional subject expressions.

5. Before the Presentation of the Speech: If you are confident that your speech is ready, present it to your colleague, so you may get feedback. Make the appropriate changes as per the suggestions received. Take care of your voice, so that you do not get a sore throat. On the day of the speech, prepare for your clothes properly, your appearance, and stand up and deliver the speech with full confidence.

In this way, each speaker should make his speech more and more interesting and effective, by incorporating the qualities required for being a good speaker. A speaker who wants to make a name for himself in this field should study all the above in order to acquire this art.

Develop Your Writing Skills

Writing is an art, in which few people excel, such as writers, poets, Screen writers, dialogue writers, etc. In order to be able to write effectively, it is essential to read, which will help to develop and improve your vocabulary. It is important to use a variety of words, to avoid being repetitive and make your writing interesting. The writings of many created a revolution. It is said the power of pen is more than that of the bullet and this will help you judge the importance of writing. However, there are many people who love writing, but are inexperienced about the style and art.

Hence if you want to be a writer and excel in good quality writing, you need to follow some steps. Good writing means expressing your experience and is the key to putting your feelings in words. A good writer adds the power of words to his thoughts and is able to rule the reader's mind. Of course, this does not happen in a single day.

Write Without thinking or Understanding:

Open a book, read it, and then write on the context of the story. Later review your writing with the book. This will help you improve your writing skills and also help to develop your imagination. You should always attempt to improve and write better everyday, which will prove your mastery on writing.

Share good information : you should start writing about what you know best. You should research for more detailed information as you progress, which will help in making your writing more accurate and comprehensive. The more research we do, the more conceptual and ideological will our writing become.

Keep reading: To be a good writer, you need to be a good reader. Reading improves your writing skills and helps you gather loads of information. You learn new words which you can use in your writing. You should also make a note of all the points you read.

Watch a movie: When you watch a movie, choose the scene of your choice. Describe the scene in your own words and also figure out how all the actors in the film can be included in your description. This will help us to include many

characters in our writing. This way we will not miss any point, but on the contrary we will learn new things.

Summary writing : While writing in school, the Marathi or English papers have a question of summary writing. The answer to this question contributes to a student becoming a writer. In the future this same essay writing contributes to becoming a writer. It is important whether we can understand and draw the essence from the complete writing. Start with writing something small, for example try to make a 100 word summary of a 2000 word article. At first you start writing something short. To begin with, consider putting a couple words into a hundred words. Read it, understand it, and try to make it more comprehensible. Learn how to express your self in a minimum number of words.

Don't rush: a writer is not made in a day. Learn to progress gradually in your writing. It is said that all good things take time and the same is with writings. Generally, very good things are not written in day, so try to write a little bit every day. Develop a writing habit and incorporate it into your routine.

Man is constantly thinking, from some thoughts of which are conscious to others which are due to culture, thought process, etc. Our thoughts, good or not so good, affect our behaviour and life. Hence, we should constantly make an effort to think positive, which can lead us to live successful lives.

Our life depends on how we think. It is said that in one day comprising of 24 hours, we process 60,000 thoughts in our mind, out of which 60 to 70% are negative ones. Every 15 to 20 seconds new thoughts are created.

When we think negatively, when we connect with the negative waves of the universe. These negative thoughts circle our mind and we move from depression to fear.

The radio or TV starts immediately once we choose the channel. Therefore it is important to fight the mind and change our negative thoughts to positive thoughts. This change to positivity will increase our strength, confidence, and self-esteem. Tukaram Maharaj has said that "night and day we fight," referring to conflict of thoughts in our mind.

Thomas Alva Edison conducted 999 experiments and he successfully discovered electricity on the thousandth experiment. When Edison was asked in an interview by reporters, "Thomas how do you feel that 999 experiments has failed?" Edison replied, "Don't say 999 experiments are a failure. Please say that 999 times I have proved that electric lamp can not be connected and used in those 999 ways."

Once, Napoleon while disembarking from a ship, fell on his face in the sand, right in front of his

army. The soldiers who were superstitious thought, "Our commander is lying face down, which means that we will be defeated today, our heads will fly." This thought terrified the soldiers. Napoleon understood their thoughts. He got up and slammed his chest and said, 'Friends, we will win the war today, wherever we go - there will be victory, because the land hugged me and said to me 'I am yours, I am yours'. Napoleon and his army had huge victories everywhere. This happened because of Napoleon's positive attitude.

A glass of water is half full on the table. If you think that half is full, then your mind is satisfied. However if you think it is half empty, then you face depression, anxiety, frustration etc. A Positive attitude keeps the mind happy, provides extra energy to the body, good karma gains momentum and self-confidence increases. Negative thoughts weaken the mind and body. As a result, the karma slows down, mistakes happen, which leads to loss and depression.

What has happened could have been worse, but I am content that it did not. I am not feeling well, but the thought that people who are more sick and unwell than me. Such thoughts usually help me control the state of mind. Former President Abdul Kalam was not recruited into the Navy and later became a scientist and President of the country. Sometimes failure is a sign of great success. So think positively and be happy.

**"Who says there are thorny strings in life?
Oh, open your eyes everyone has
wings like a butterfly to fly."**

- ★ To provide opportunities to all deserving students to participate in India of the 21st century.
- ★ To spread educational awareness among all stakeholders
- ★ To financially support eligible students for accomplishing their educational goals and occupational aspirations.
- ★ To develop and implement a comprehensive package of initiatives resulting in empowerment for stakeholders.
- ★ To make the program self-sustainable so that more and more students can benefit.

TESTIMONIALS

Patil Bhavana Vikas, Jalgaon - BHMS (First Year)

SD-SEED is a very valuable scheme. I was hesitant to continue my studies in medicine, after Class 12, due to financial constraints. It was at this time I was awarded the SD-SEED Scholarship and without any further thought I took admission in Medicine stream.

The SD-SEED Scholarship is a blessing because like a pillar Hon Dada a great philanthropist is supporting us. This Scholarship helped me secure my admission in a medical college, pay fees and buy books at a time when I did not have money. This has helped me realise that I am not alone. I am not even worthy to thank SD-SEED, but Hon Dada truly my deepest gratitude to you. You have put life into my drooping wings and enabled me fly high in the skies.

Saitwal Sakshi Jitendra, Jalgaon - Diploma Computer (Third Year)

I have been availing the benefits of SD-SEED Scholarship for the last two years, which is not only a source of financial aid, but also motivates and guides me. The financial condition of the family is very weak. My father is a daily labourer. I was facing financial constraints while planning my future education. I came to know about the SD-SEED Scholarship, applied and was awarded the same based on my merit. Today I have chosen a good career and am going to soon successfully complete it. All this has been made possible only because of SD Seed. My deepest gratitude to Hon Shri Dada for all the financial aid

Sali Saniket Sunil, Amalner SYJC (HSC) Science

At the outset heartfelt appreciation to sd seed for extending financial assistance to students. I scored 92% in my SSC exams and wanted to continue my studies in Science, but I was facing financial constraints. It was under these circumstances that I was blessed with the SD-SEED scholarship, which has helped in buying books paying fees and other college related material. SD-SEED is a guide for intelligent students and motivates them to complete their education and become model citizens for the country. It is said that there are many hands to receive help, but you rarely find hands that are ready to give. The noble hands that are giving us are that Hon. Shri Suresh dada and I pray that Dada is blessed with a long life.

Patil Shrikrishna Sarangdhar, Jalgaon - MCA (Second Year)

I am currently studying in MCA (Second Year) I migrated from the rural area to Jalgaon city to pursue my education. However, I had to deal with various difficulties due to my strained financial circumstances. It was at this challenging time that SD-SEED came to my aid and I could reduce my financial problems to a large extent. We are all proud of Hon Shri Suresh Dada as he selflessly helps, motivates and guides students to continue and complete their education. I promise Dada that when I become financially independent I will sponsor five students to complete their education and achieve their goal.
